Concurring Statement of FCC Commissioner James H. Quello

In Re: Application of Satellite Television Corporation for a
construction permit in the Direct Broadcast Satellite
Service

I have a continuing concern about the potential adverse impact Direct
Broadcast Satellite programming may have on local broadcast service.^{1/}
Nevertheless, this new technology may offer substantial benefits to American
viewers, and I concur in this authorization.

^{1/} See Report and Order, 47 Fed. Reg. 31553
(July 21, 1982) (concurring opinion)
