Quello Center Events

Advisory Board Meeting, September 2015

Recent Events

We have had a steady flow of events, with most video recorded for Webcasts. We have limited events in light of not having an events officer, but with new staff and additional support, they are likely to rise again in frequency. All past and future scheduled events are available online at: http://quello.msu.edu/events/ But a brief summary of recent and forthcoming events follows:

Over the summer months, we had presentations on Internet innovations shaping accountability in India, by Venkatesh Kannaiah, talks by Bianca Reisdorf and Aleks Yankelevich, and an informative 'Anatomy of the FCC's Network Neutrality Rules', by our law colleague, Adam Candeub. We also continued a series of roundtables for our faculty, this one focused on 'Powerful (Social) Media Effects'. Of course, after our last Advisory Board Meeting, we held several events marking Professor Steve Wildman's departure, including his leaving lecture on 'Dominating and Leveraging Domination in Search Markets'.

Dr David Bray, the CIO of the FCC, delivering a Quello Lecture on 'The Importance of Public Service #ChangeAgents in Exponential Times' in Communication Arts & Sciences, Sep 21 @ 3:00 pm – 4:30 pm http://quello.msu.edu/event/changeagents-and-public-service-in-the-digital-age-by-david-bray/?instance_id=288

Professor Laura DeNardis, American University, and Quello Advisory Board, delivering a Quello Lecture in Washington DC Offices of MSU on 'The Destabilization of Internet Governance', 24 September from 2-3pm at 1100 New Jersey Avenue Southeast #735, Washington, DC 20003, USA.

Forthcoming

Professor Eli Noam, Columbia University and Quello Advisory Board, delivering a Quello Lecture on 'Who Owns the World's Media? Media Concentration and Ownership in the Digital Age', see: http://quello.msu.edu/event/media-concentration-in-the-digital-age-a-quello-lecture-by-professor-eli-noam/?instance_id=275

Yong-Chan Kim, at Yonsei University, Korea, speaking on "Localized Uses of Information and Communication Technologies in Urban Neighborhoods: From a Communication Infrastructure Theory Perspective" at 4pm on 12 November 2015

Professor Keith Hampton, Rutgers University, speaking at MSU at 4pm on 10 December, 2015. Keith has done seminal work on the Internet and its impact on communities.
