Statement of Commissioners Anne P. Jones and James H. Quello  
Re: Application of Sunshine Wireless Inc. for Renewal of  
Standard Broadcast Station KCKC, San Bernardino, California

We concur in the Commission's decision to renew this license, but we question the appropriateness of attaching EEO reporting conditions to the renewal. It seems to us that statistical analysis of the work force of a small licensee like this one may tell us little or nothing about the EEO efforts of the licensee or its ability to achieve a representative work force by reasonable effort. We therefore believe that where, as here, there is evidence of substantial effort by a licensee to comply with our EEO rules, we should be very slow to impose any sanction or additional requirement simply because the licensee's work force falls short of our statistical EEO criteria.
